This booklet presents the locations from the adventure “Going for Gold” as printable scaled battlemaps. The maps are usable for any modern or near future game as generic locations. There is also a page of paper figures representing the enemies from the adventure. If you need more of a particular type you can always print out multiple pages.

Printing Notes

When printing the maps make sure to set the “Page Scaling” to none. (see figure 1) This will insure that the maps print at the proper scale and will match up correctly.

When printing I have found that the various photopapers work very well. They show the colors and detail well and are thicker than regular paper, giving the figure in particular a little more durability.
