CALENDAR NOTES

The Imperial calendar year is 400 days, consisting of twelve months of 32 or 33 days each and six intercalary holidays. These holidays exist outside of the normal sequence of weekdays and months.

The names of the months can be translated as After-Witching, Year-Turn, Plough-Tide, Sigmar-Tide, Summer-Tide, Fore-Mystery, After-Mystery, Harvest-Tide, Brew-Month, Chill Month, Ulric-Tide and Fore-Witching.

The days of the week translate to Workday, Levyday, Marketday, Bakeday, Taxday, Kingday, Startweek and Holiday. However, in current usage these names are largely meaningless.

THE APPEARANCE OF MORRSLIEB

Morrslieb is the mysterious second moon that goes by many names: Beloved of Morr, Blood Moon, Chaos Moon, Dark Star, Dead Moon, Eye of Morr, Harbinger Moon, Pestilent Moon, Tempest Moon, Wandering Moon, and so on. Its orbit is erratic and no seer or man of science has yet to understand its patterns, except to observe that Morrslieb is always full on two nights each year, Hexensnacht and Geheimnisnacht. For unknown reasons, it is rarely seen during the months of Sommerzeit and Nachgeheim, but seems to dwell in the northern skies in autumn (from Erntezeit through Ulriczeit),

and in the western sky in spring (from Nachexen through Pflugzeit).

During the peak months, there's a 10% each night that this moon will be visible in the sky. Morrslieb sometimes stays visible over the course of several nights, or only on every other night (or greater, stranger intervals). Use the table below to create memorable sightings of Morrslieb. Roll 1d10 for each column and combine the characteristics.

Roll	Phase	Color	Movement or Event	Portent or Superstition
1		Brownish orange	Accompanied by falling stars	A great flood will come the following spring
2		Dark green	Changes color	A mutant child will be born this night
3		Gray	Changes luminosity	Famine for eight years
4		Grayish brown	Crosses north to south	Forces of Chaos conspire on this night
5		Grayish green	Crosses west to east	Keep your hat on after dark and do not look up
6		Luminous green	Eclipse	Only the dead dare walk under this moon
7		Luminous pink	Fast moving	Plague will spread within one month
8		Luminous yellow	Hangs low on the horizon	Prick your thumb and pray to Morr
9		Mulberry	Passes behind Mannslieb	The meat of fish and game is tainted this night
10		Yellowish green	Passes in front of Mannslieb	Wear no black clothes on this night

DETERMINING BIRTHDATE

Use these tables to determine birthdates for characters, or to randomly generate any calendar date. Roll percentile on the Month or Holiday table. Roll again on the Intercalary Days table if needed. Otherwise, each month includes a note of the number of days it contains. Roll percentile again on the Date table. If you are rolling for a date in a 32-day month and your result is '33rd or Intercalary Day' you should roll on the Intercalary Day table instead.
